

**Was your test for HIV a rapid test? by Year Total, County, BRFSS Age Group, DOH Race-Ethnicity, Gender, County and Community, Education Level, Employment Status (Grouped), Household Income, Island, Marital Status (Grouped), Poverty Level, for the Year(s) - 2006, 2007**

*Note: Weighted numbers (#), percentages and 95% confidence intervals; Respondents aged 18 years and older;  
n/r (Not Reportable) - Represents cell size restriction of unweighted count < 50;  
n/a (Not Available) - Not asked of a subset of respondents*

*The trend analysis report shows the trend for the selected health variable over selected years in a table and a graph; Estimated Adult Population: This number is a weighted representation of the adult population who responded to a particular question in the survey. For most questions the estimated adult population will be the entire adult population. For some secondary questions only a subset of the population was asked the question. For example, all survey participants were asked if they had diabetes, but only those who answered yes were asked if they use insulin. If a dimension value is unknown for a particular survey record, that record will not be included in the counts for that particular dimension.*
